

Creative Business Planner

Move from a service idea to a small, testable offer.

Zara Ellis

Fictional editorial pen name • Original learning workbook

Guided explanations, examples, exercises and writing space

READ BEFORE USING

A practical workbook, honestly described.

Creative Business Planner uses the fictional editorial pen name Zara Ellis. That name does not represent a verified professional identity, biography, qualification or affiliation.

This is original, AI-assisted educational starter material. It contains guided practice pages, fictional scenarios, planning tools, self-review rubrics and writing space. It is not a 256-page continuous-prose textbook, an accredited course, a professional certification or individual advice.

The examples are invented for practice. Organisations, clients, outcomes and figures in exercises are fictional. Do not use them as customer testimonials or as evidence of commercial results.

You may complete the exercises for your own learning or authorised internal training. A store owner should review and approve the content, product description and local terms before selling it. Do not imply endorsement by any named platform or software provider.

For exercises involving personal or organisational information, work with fictional or authorised material. Keep passwords, card details, sensitive records and confidential information out of shared worksheets.

This workbook does not promise employment, earnings, business growth or any particular result. Professional decisions require appropriate review for your own circumstances.

HOW TO USE THIS BOOK

One useful lab at a time.

Choose your context

Independent creatives planning an honest offer, scope and sustainable workflow.

Use a real, bounded project

Pick a small task you can describe without disclosing confidential information. You can instead use the fictional studio examples in the labs.

Work through eight moves

Each lab includes a concept brief, a worked example, a mapping page, a decision table, a constraint scenario, a project draft, a self-review and a next-step plan.

Treat writing space as working space

The pages intentionally leave room for sketches, drafts and corrections. Record why you made a choice, not just the choice itself.

Check before you apply

Separate what you observed from what you assumed. Test a small revision and ask a suitable reviewer about high-impact decisions.

CONTENTS

Your learning route / 1

01 / Choose a service

01 Skills and interests — page 9

02 Service ideas — page 17

03 Constraints — page 25

04 Portfolio evidence — page 33

05 Offer hypothesis — page 41

02 / Understand the client

06 Client situation — page 49

07 Buying questions — page 57

08 Alternatives — page 65

09 Decision process — page 73

10 Discovery brief — page 81

03 / Shape the offer

11 Deliverables — page 89

12 Scope boundaries — page 97

13 Price assumptions — page 105

14 Proposal outline — page 113

15 Success criteria — page 121

CONTENTS

Your learning route / 2

04 / Plan delivery

- 16 Project stages — page 129
- 17 Time estimate — page 137
- 18 Resource needs — page 145
- 19 Revision process — page 153
- 20 Handoff package — page 161

05 / Build relationships

- 21 Outreach note — page 169
- 22 Follow-up rhythm — page 177
- 23 Client update — page 185
- 24 Feedback request — page 193
- 25 Repeat work — page 201

06 / Review the business

- 26 Project review — page 209
- 27 Capacity check — page 217
- 28 Cost awareness — page 225
- 29 Improvement list — page 233
- 30 Next experiment — page 241

LAB 01 / CHOOSE A SERVICE

Skills and interests

Purpose

Use this lab to make skills and interests visible rather than leaving it as a vague intention. The output is a one-page skills and interests. Aim for a draft you can explain and revise, not a polished document with missing assumptions.

Connect it to your route

This task belongs to choose a service. Review your notes on skills and interests and decide which inputs are relevant. Do not copy every earlier detail; carry forward only information that supports the current decision.

A practical method

First, name the person who will use the result. Then record the question, the inputs you have and the information still missing. Draft the smallest useful version. Compare it with the intended outcome and ask what could be misunderstood.

Observation versus assumption

Label a statement as observed, supplied, estimated or still unknown. An attractive layout does not make an unsupported claim more reliable. Keep an evidence note beside any decision that depends on a fact.

Ready for review when

A reader can identify the purpose, your chosen approach and one next action. Keep unresolved questions visible so the next lab, service ideas, starts from an honest record.

Your focus

Write one sentence describing what this lab should help you decide.

LAB 01 / WORKED EXAMPLE

A draft you can question.

The fictional example follows a small studio preparing a one-page skills and interests for a small project. They have one working session and need something another person can understand without a long explanation.

Initial draft

"We need a better skills and interests." This names the area but not the user, boundary or test of success.

More useful draft

"Create a one-page skills and interests for our next review. State the intended user, the three most important inputs, one unresolved question and the action we want the reader to take."

Review note

The team separates supplied information from estimates. They keep the first version small and ask a second person to explain what they think it means.

Revision decision

If the reader cannot explain the intended action, revise the order and labels before adding more detail. Carry the unresolved question into service ideas.

Your critique

What would you keep, change or test in this fictional example?

LAB 01 / MAP THE INPUTS

Make the starting point explicit.

Complete the fields for skills and interests. A precise boundary is more useful than a long list of unsupported detail.

User and purpose

Who will use the result? What decision should it support?

Known inputs

What information is available? Record its source or origin.

Unknowns and assumptions

Which statements need checking before you rely on them?

Constraints

What limits the time, scope, format or level of detail?

LAB 01 / COMPARE OPTIONS

Choose with a reason.

List three possible approaches to skills and interests. Compare them using the same criteria, then explain your choice. Leave a question open rather than filling an unknown cell with a guess.

Approach	Why it helps	Main limitation	What to check

Preferred approach

State your choice, the reason for it and the uncertainty that remains.

LAB 01 / REVIEW RUBRIC

Check the work, not just completion.

Review your skills and interests using the questions below. Mark each one as clear, needs work or not yet checked. Write an example to justify your mark.

Purpose

Can a reader explain what this output is for?

Evidence

Are observations and assumptions visibly separated?

Usability

Is the structure clear enough for the intended reader?

Action

Is there a realistic next step and a named unresolved question?
